

Annual Scientific Update Meeting & AAOMS National Simulation Program (OBEAM)

Westerville, Ohio

With Joint Providership from the American Association of Oral and Maxillofacial Surgeons

Annual Scientific Meeting

Presenters

Matthew Kushner, DDS Maxillofacial Prosthodontist, Cleveland

Paul Shivers, MD, DMD Head and Neck OMFS, University of Michigan

Ivan J. Stojanov, DMD Head and Neck/OMF Pathologist, Cleveland Clinic

Meeting Chair

Max Beushausen, DMD, MD

This course will provide up to 6.0 hours of CDE/CME credits.

Schedule

Friday, April 12, 2024					
Session Times: 7:00 - 9:00 AM 9:30 - 11:30 AM 12:30 - 2:30 PM 3:00 - 5:00 PM	Office-Based Emergency Airway Management (OBEAM) *				
Saturday, April 13, 2024					
7:00 - 9:00 AM	Office-Based Emergency Airway Management (OBEAM) *				
8:00 - 10:00 AM	Bone Pathology of the Maxillofacial Complex Ivan J. Stojanov, DMD				
10:00 - 10:30 AM	Break				
10:30 AM - 12:30 PM	The Old and the New of Reconstructive Options Paul Shivers, MD, DMD				
12:30 - 2:00 PM	Lunch				
2:00 - 3:00 PM	Prosthetic Rehabilitation of the Surgically Compromised Patient and their Long-Term Maintenance Matthew Kushner, DDS				
3:00 - 3:30 PM	Break				
3:30 - 4:30 PM	Prosthetic Rehabilitation of the Surgically Compromised Patient and their Long-Term Maintenance (continued) Matthew Kushner, DDS				

OBEAM Session Friday, April 12

Office-Based Emergency Airway Management (OBEAM)

In recent years, advanced technology has made it possible to train surgeons and staff by simulating a full range of real-life emergency airway situations.

The AAOMS National Simulation Program allows participants to practice and master critical techniques for administering and monitoring office-based anesthesia. Unlike previous anesthesia emergency simulation courses, this program is standardized to assure every participant experiences the same simulated events. Its state-of-the-art technology enables AAOMS to automatically evaluate the performance of every participant and pinpoint those areas that may benefit from additional training. In short, this new three-part program offers oral and maxillofacial surgeons and their staff an effective method of assessing their readiness to meet an office anesthesia emergency situation.

OSOMS is offering this course, in partnership with AAOMS, during our annual meeting. Registration for the OSOMS Annual Meeting IS required in order to register for the OBEAM course.

Once OSOMS annual meeting registration is received, you will receive a link to register for the OBEAM course.

Cost to attend OBEAM is \$900

(payable to AAOMS, separate fee from OSOMS meeting)

Location: Renaissance Columbus Westerville-Polaris Hotel

Sessions are limited to 10 individuals - so register early.

6.0 CDE/CME

Session Times:

Friday, April 12, 2024

7:00 - 9:00 AM 9:30 - 11:30 AM 12:30 - 2:30 PM 3:00 - 5:00 PM

Saturday, April 13, 2024 (recordings available of OSOMS meeting session missed) 7:00 - 9:00 AM

The American Association of Oral and Maxillofacial Surgeons is an ADA CERP Recognized Provider. ADA CERP is a service of the American Dental Association to assist dental professionals in identifying quality providers of continuing dental education. ADA CERP does not approve or endorse individual courses or instructors, nor does it imply acceptance of credit hours by boards of dentistry.

The American Association of Oral and Maxillofacial Surgeons designates this activity for 6.0 continuing education credits.

AGD - Accepted Program Provider FAGD/MAGD Credit 11/1/22-12/31/26 Provider ID# 214680

The American Association of Oral and Maxillofacial Surgeons (AAOMS) is accredited by the Accreditation Council for Continuing Medical Education (ACCME) to provide continuing medical education for physicians.

The American Association of Oral and Maxillofacial Surgeons designates this live activity for a maximum of 6.0 AMA PRA Category 1 Credit(s)[™]. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

OMS Sessions Saturday, April 13

Course Descriptions

8:00 - 10:00 AM Bone Pathology of the Maxillofacial Complex Ivan J. Stojanov, DMD

Accurate diagnosis in maxillofacial bone pathology is challenging, yet critical for optimal patient management. Reasons for difficulty include ever-changing terminology and classification of disease; overlapping clinical, radiographic and microscopic presentations which often necessitate careful correlation and communication across specialties; and anatomic constraints resulting in small, occasionally insufficient biopsy samples. This course will discuss the pathogenesis, classification, and essential diagnostic features of benign fibro-osseous lesions, giant cell lesions, selected odontogenic cysts/neoplasms, and other benign and malignant tumors that may occur in sporadic or syndromic settings.

Objectives:

- 1. Analyze contemporary classification schemes for intraosseous disease from the maxillofacial region.
- 2. Evaluate the current role and limitations of molecular pathology in the diagnosis of intraosseous disease from the maxillofacial region.
- 3. Determine what information a pathologist requires to generate a definitive pathology report.
- Identify diagnostic pitfalls that may arise from overlapping clinical, radiographic, and microscopic presentations.
- 5. Review current neoadjuvant and nonsurgical therapeutic approaches for intraosseous disease from the maxillofacial region.

10:30 AM - 12:30 PM The Old and the New of Reconstructive Options Paul Shivers, MD, DMD

Surgical and non-surgical management of maxillofacial bone pathology requires a delicate balance of effective eradication of disease and minimization of morbidity particularly for benign processes. Likewise, varying reconstructive and rehabilitative options often face a trade-off between complexity of surgery and functional outcomes. This course will delve into clinical scenarios for maxillary and mandibular bone lesions with a focus on utilization of the latest advances for optimal therapies.

Objectives:

- 1. Review of surgical approaches for bony pathology of the jaws with an emphasis on advances in virtual planning.
- 2. Discussion of non-surgical management for benign bony pathology.
- 3. Reconstructive options for both maxilla and mandible including novel techniques to minimize surgical morbidity.

2:00 - 3:00 PM & 3:30 - 4:30 PM

Prosthetic Rehabilitation of the Surgically Compromised Patient and their Long-Term Maintenance Matthew Kushner, DDS

The advent of new treatment modalities has drastically improved the prognosis for head and neck cancer patients as well as other patients with acquired defects of the stomatognathic system. The sequalae of these treatments have remarkable impacts on the individual necessitating modified long-term care protocols. Prosthetic rehabilitation is markedly complicated by altered anatomy and physiology. During this presentation, we will review long-term treatment modifications to maintain such individuals in a relative state of health as well as prosthetic protocols to restore and rehabilitate function and esthetics.

Objectives:

- 1. Review the short- and long-term impacts of surgery and radiotherapy on patients.
- 2. Review of anatomy, specifically with how it pertains to prosthetic treatment planning.
- 3. Develop and understand anatomic expectations for prosthetic success.
- 4. Develop and understanding of surgical interventions which will facilitate prosthetic rehabilitation.

Hotel & Meeting Information

Renaissance Columbus Westerville-Polaris Hotel 409 Altair Parkway Westerville, Ohio 43082

OSOMS Room Rate \$149.00 applicable for Friday, April 12 and Saturday, April 13 only. Deadline for block rate is March 22. Special rate honored until room block capacity is filled or March 22, 2024 (whichever occurs first).

Call (614) 882-6800 for reservations and reference Ohio Oral Surgeons Annual Meeting to receive the group rate or reserve online via link on our website

Continuing Education Credits

This continuing education activity has been planned and implemented in accordance with Standards of the ADA Continuing Education Recognition Program (ADA CERP) through the joint efforts between the American Association of Oral and Maxillofacial Surgeons and the Ohio Society of Oral and Maxillofacial Surgeons.

American Association of Oral and Maxillofacial Surgeons is an ADA CERP Recognized Provider. ADA CERP is a service of the American Dental Association to assist dental professionals in identifying quality providers of continuing education. ADA CERP does not approve or endorse individual courses or instructors, nor does it imply acceptance of credit hours by boards of dentistry.

American Association of Oral and Maxillofacial Surgeons designates this activity for 6.0 hours continuing education credits.

AGD - Accepted Program Provider • FAGD/MAGD Credit • 11/1/22 - 12/31/26 • Provider ID# 214680

This activity has been planned and implemented in accordance with the accreditation requirements and policies of the Accreditation Council for Continuing Medical Education (ACCME) through the joint providership of the American Association of Oral and Maxillofacial Surgeons and the Ohio Society

of Oral and Maxillofacial Surgeons. The AAOMS is accredited by the ACCME to provide continuing medical education for physicians.

The American Association of Oral and Maxillofacial Surgeons designates this live activity for a maximum of 6.0 *AMA PRA Category 1 Credit*(s)TM. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

The OSOMS is approved as a permanent sponsor for educational activity certified as Category I of Continuing Education as designated by the Ohio State Dental Board.

Speakers

The following speakers and planners have nothing to disclose: Beushausen, Clemow, Kushner, Schiefferle, Shivers, and Stojanov.

Ivan J. Stojanov, DMD

Dr. Ivan Stojanov is a staff pathologist in the Robert J. Tomsich Pathology & Laboratory Medicine Institute at Cleveland Clinic. Dr. Stojanov obtained his dental degree from the Medical College of Georgia and completed his residency training in oral & maxillofacial pathology at Harvard School of Dental Medicine/Brigham and Women's Hospital. Dr. Stojanov is an active

member of Cleveland Clinic's Head and Neck Pathology division, which provides pathology services in the areas of maxillofacial, otolaryngic, sinonasal, salivary gland, thyroid gland, and frozen section pathology and receives second-opinion consultations from around the country. Dr. Stojanov also oversees the oral pathology outreach service within the division and is active in resident teaching and research. Prior to joining Cleveland Clinic, he served as an assistant professor at Case Western Reserve University School of Dental Medicine. Dr. Stojanov is a member of the American Academy of Oral and Maxillofacial Pathology, North American Society of Head and Neck Pathology, and United States and Canadian Academy of Pathology.

Paul Shivers, MD, DMD

Paul L. Shivers DMD, MD is a faculty member of the Department of Oral and Maxillofacial Surgery/Hospital Dentistry within the Department of Surgery at the University of Michigan Hospitals. Dr. Shivers received his bachelor's degree from Ohio State University and dental degree from Case Western Reserve University. He subsequently received his medical

degree and completed residency training in oral and maxillofacial surgery at Case Western Reserve University. Following residency, he completed fellowship training in oncology and microvascular reconstructive surgery at the University of Michigan. Dr. Shivers specializes in diagnosis and treatment of adult oral and maxillofacial conditions, with an emphasis in pathology and trauma of the head and neck.

Matthew Kushner, DDS

Matthew Kushner, D.D.S is Maxillofacial Prosthodontist and native of Cleveland, Ohio. He earned a Bachelor of Science in Microbiology from The Ohio State University where he subsequently received his DDS degree at The Ohio State University, College of Dentistry. Following graduation he moved to Louisville, Kentucky to complete his first year long hospital

based general practice residency. It was here that he met his wife. He subsequently moved to San Antonio to complete his three-year advanced prosthodontic training at The University of Texas Health Science Center, San Antonio during which time he presented before the Texas section meeting of the American College of Prosthodontics as well as the ITI, a Swiss based implant study organization. While at UTHSCSA he served as a clinical and laboratory instructor for dental students. He completed his one-year fellowship in maxillofacial prosthetics at the University of Alabama, Birmingham. Dr. Kushner is a member of the American Academy of Maxillofacial Prosthodontists which he has presented before on several occasions. He is additionally a member of the American Dental Association, Ohio Dental Association, and Greater Cleveland Dental Society.

Registration Form

Register online at www.oh-oms.org or mail this form.
